Vision Statement

- To be the go-to coffee destination where community, quality, and innovation brew together.

- To fuel moments of joy and connection, one cup at a time.

- A world where every coffee experience is crafted with love and purpose.

Mission Statement

- To serve exceptional coffee, create meaningful connections, and contribute to our community's vibrancy.

- We brew quality, spark conversations, and make every visit memorable.

- Delivering great coffee, fostering community, and driving positive impact

The vision and mission of Bright Coffee Shop reflect its strategic intent to grow as a competitive and customer-centric business within the coffee retail industry. The vision emphasizes long-term aspirations, focusing on brand growth, market expansion, and customer loyalty. In contrast, the mission outlines the organization's day-to-day operational priorities, including product quality, service excellence, and data-driven decision-making.

Together, these statements provide a clear direction for the business, guiding both strategic planning and operational execution. They also align closely with the objectives of this analysis, which aims to support the CEO in identifying opportunities to increase revenue, improve product performance, and enhance customer satisfaction through informed, data-driven insights.

OBJECTIVES

- To identify products that generate the highest revenue
- To determine peak and off-peak sales periods
- To analyse sales trends across different time intervals
- To evaluate product performance based on sales and quantity
- To provide data-driven recommendations to improve business performance

Methodology

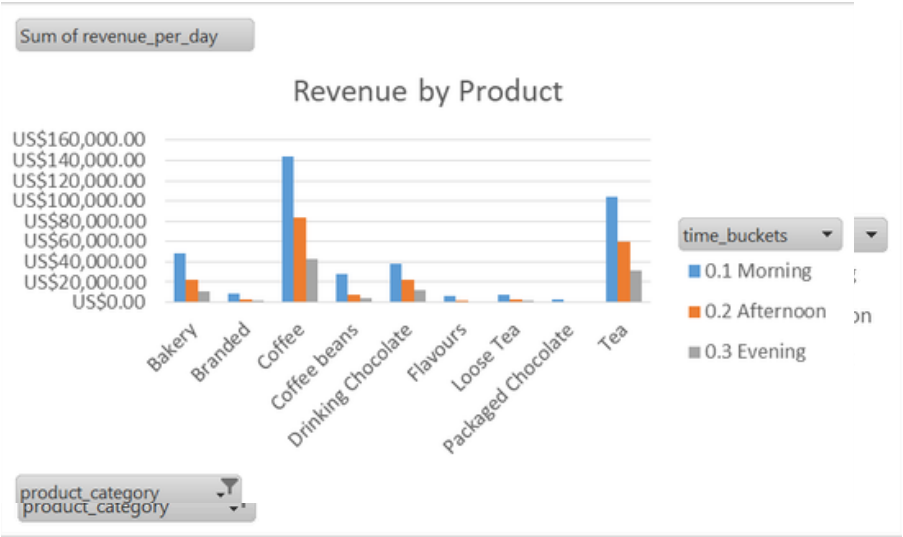
- The dataset was reviewed and confirmed to be clean and analysis-ready
- Data was processed and analysed to calculate total revenue and sales trends
- Transactions were grouped into time intervals to identify peak periods

Tools Used:

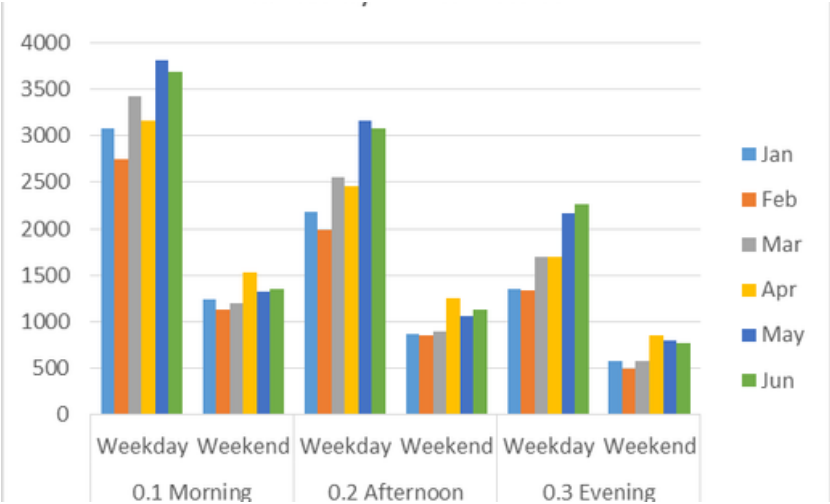
- Canva – for presentation design
- Miro – for project planning and data flow design
- Databricks – for data processing and analysis

Key Insights

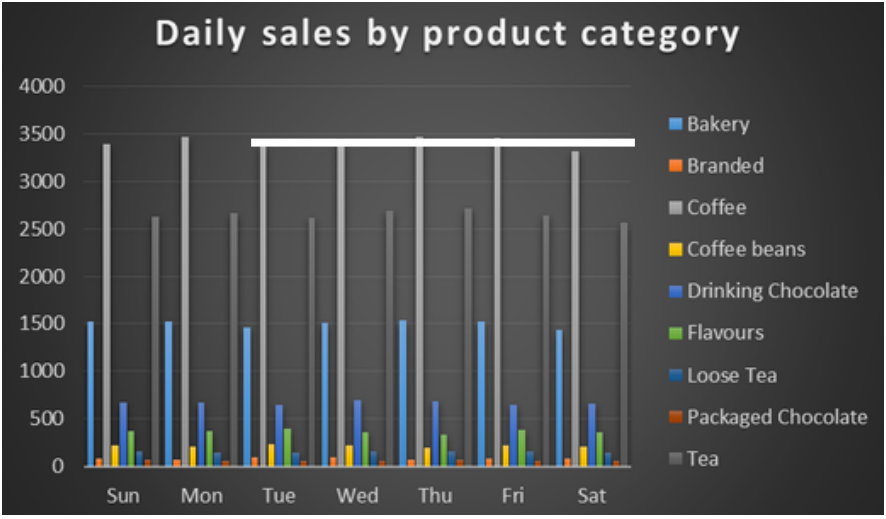
Revenue is driven mainly by coffee and tea, with mornings showing the strongest performance. Smaller categories contribute little overall, highlighting the importance of focusing on core products during peak hours.



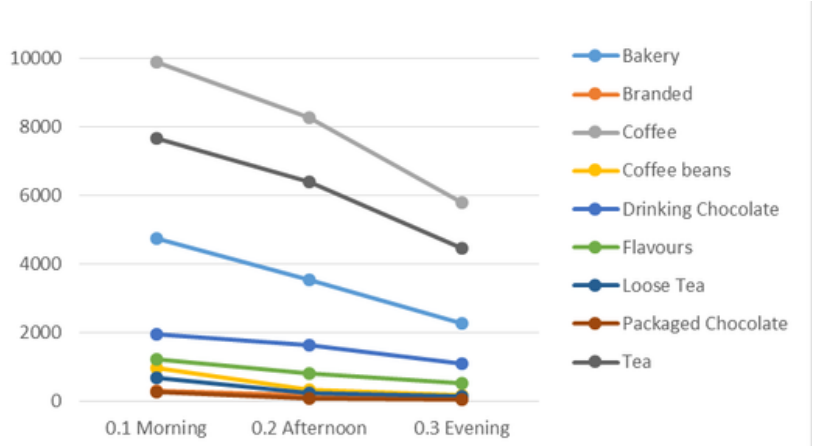
Sales activity is highest during mornings and weekends, suggesting peak customer demand and the need for optimized operations during these hours.



Daily sales are consistently led by coffee and bakery items, with strong performance across the week. Smaller categories contribute less, highlighting the importance of focusing on core products to sustain demand.



Sales activity peaks in the morning across all product categories, gradually declining through the day. This pattern highlights peak customer demand early on and the need for optimized operations during morning hours.



1. **Optimize Peak Hours**

- Focus staffing, inventory, and promotions during morning hours, when demand is highest.
- Introduce quick-service options (grab-and-go coffee/tea packs) to maximize throughput.

2. **Strengthen Core Products**

- Coffee and tea drive the majority of revenue — ensure consistent quality, stock, and variety.
- Expand premium offerings (specialty brews, seasonal teas) to capture loyal customers.

3. **Boost Underperforming Products**

- Bundle weaker items (Flavours, Packaged Chocolate, Loose Tea) with popular products to increase visibility.
- Use targeted promotions (e.g., Add a chocolate for half price with any coffee).

4. **Improve Evening Sales**

- Introduce evening-specific promotions (happy hour discounts, combo deals).
- Consider adding light snacks or entertainment to attract customers after work hours.

5. **Marketing & Loyalty**

- Launch loyalty programs rewarding frequent morning buyers.
- Use digital campaigns to highlight best-sellers and promote underperformers.

6. **Operational Next Steps**

- Automate daily sales dashboards for real-time monitoring.
- Track performance by location (if expanding) to identify regional trends.
- Continuously review product mix to align with customer preferences.

THANK YOU
